Panel Session Proposal Guidelines

*A Panel Session is a group of papers organized by an individual or group of individuals and submitted as such to the ARCE Review Committee.

* Between three to four individual papers can be entered into each Panel Session. Each paper should be sent to the Panel submitter to enter as part of the panel into the All-Academic submittal system:
https://convention2.allacademic.com/one/arce/arce24/

* The Panel submitter should select 'Panel Proposal' under Submission Type. The individual submitting the panel proposal will be identified here as the Session Organizer and will be expected to serve as the chair of the panel, should it be accepted. Please submit a title and overall abstract for the session, and then follow the prompts to add abstracts to compile the proposed panel.

*Once the panel proposal has been completed and submitted you will receive an automatic reply from All Academic that it has been received and is in the system for review by the Annual Meeting Review Committee.
